June 24, 1998

Dear Mr. Breitenbach,

I'm writing you in order to make comments on the CalFed

program.

My feeling is that no water should be diverted to areas outside of the Sacramento Watershed. The Fishery should have

the highest priority since it is critically at risk of collapse.

My belief is that the Fishery is in trouble due to previous diversions of water for agriculture and export to Southern California.

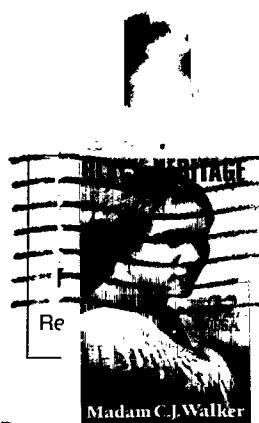

Any proposal which seeks to fix the delta by taking more water out through a diversion channel will fail and must be opposed!

Sincerely,

Ron Glick
